I believe design begins where empathy, precision, and purpose meet intent. From field research to digital systems, crafting experiences that uplift and transform challenges into value-driven design. A user-centered designer with the ability to work as a team of one or in diverse, collaborative teams.

WORK EXPERIENCE

UX/UI Designer | BRND Studio (March 2024 - June 2025)

- 5 B2B and B2C products delivered at scale, including SaaS dashboards and AI tools, by driving end-to-end design with cross-functional teams from concept to launch.
- 3x faster user workflows enabled by translating focus-group and survey research into usability improvements that increased efficiency and overall experience.
- Reduced support costs by 40% and manual effort by 52% through automated communications and standardised collaterals, strengthening user engagement and reducing drop-offs.

Summer Trainee | Grant Thornton Bharat LLP (January 2023 - July 2023)

- 25% potential revenue uplift identified by designing two new product lines through market research, competitive analysis, and persona-driven product development with artisans.
- 25 women artisans upskilled to improve product marketability and sales readiness through structured, design-led training workshops.
- 1,300-year-old craft preservation informed by ethnographic research that translated cultural insights into actionable, sustainability-focused design solutions.

Design Intern | Pichkaari Design Studio (June 2022 - August 2022)

- 3+ products improved across devices by redesigning user experiences with responsive, mid-fidelity prototyping.
- Strengthened brand perception for a ridesharing client with 100M+ users by leading a typography, colour theory, and prototyping-driven identity revamp.
- 50+ participants achieved stronger collaboration and team engagement via a gamified interactive workshop.
- Conducted 20+ stakeholder interviews to align leadership on design goals and guide key product decisions.

Research Scholar Intern | Thinkonomers (HDL) (May 2021 - June 2021)

- 25+ user interviews and observations informed design recommendations that shaped stakeholder decisions around improving aural hygiene routines.

INDEPENDENT RESEARCH & DESIGN PROJECTS

STI Management in Female Sex Workers (December 2023)

- 15+ field interviews and systemic-level contextual enquiries with female sex workers informed design solutions that could improve access to STI healthcare resources.

Studying Touch and Self-Identity (December 2023)

- An 8-participant mixed-method research study informed the design of an educational activity kit that supported appropriate response development for children aged 8-13.
- 50% increase in emotional-awareness comprehension validated through usability testing with 5 participants, strengthening the activity kit's effectiveness and sensitivity.

Tool to Improve Handmade Garland Weaving (March 2022)

- Designed a mechanical assistive tool that enhanced the efficiency and comfort of traditional garland weaving, practised by over 80% of weavers, thereby reducing physical strain for flower vendors.

OTHER INTERESTS

Public Speaking, Theatre, Dancing, Painting, Working with materials like wood, resin, and glass (Carpentry), Renovations and Redecorating

EDUCATION

Master of Science | Human Centered Design and Engineering (September 2025 - June 2027)

University of Washington, Seattle 4 GPA

Bachelor of Design | Industrial Design (June 2019 - December 2023)

National Institute of Design 8.6 CGPA

Academic Excellence Award recipient (highest GPA).

SKILLS

Design

User Journey Mapping, Information Architecture, Systems Thinking, Prototyping, UI Design, Design Sprints, Visual Design

Research

User Research, Ethnographic Research, A/B Testing, Usability Testing and Engineering, Data Analysis, UX Research

Software

Figma, Sketch, Adobe Creative Suite, Blender, AutoCAD, Rhinoceros 3D, Keyshot

AWARDS AND RECOGNITION

International Conference on Research into Design - Research Paper Selection (January 2025)

Department of Design, IIT Hyderabad

- Explored touch's effect on self-identity, uncovered social biases, and created a workshop kit to teach children.

Approved Invention Patent (September 2024)

National Research Development Corporation

- Granted a utility patent for a tool improving the table loom weaving experience for students, reducing errors.

D'source Design Challenge (June 2020)

IDC School of Design (IIT)

- Designed a board game to raise COVID-19 awareness, highlighting cooperation and the roles of key systems.

EXTRA-CURRICULAR ACTIVITIES

Academic Mentor, NID (2022 - Present)

- Delivering lectures on advanced design research, using case studies to enhance practical learning.

Committee Membership (2025 - Present)

- Board of Studies: Represented student perspectives in curriculum redesign and academic decision-making.

- Kalam Program for IP Literacy and Awareness: Initiatives promoting student IP awareness.
