206-532-8676 · Seattle, WA

Product designer who thrives in ambiguity and specialises in simplifying complex systems into intuitive, user-centred experiences. Combining research, systems thinking, and AI-native product development transforms uncertainty into clear, scalable solutions across enterprise, SaaS, and emerging technology products.

EDUCATION

MS Human-Centered Design and Engineering (HCDE) – University of Washington, Seattle

Expected 2027

Relevant Coursework: User-Centered Design, Usability Studies, Interaction Design & Prototyping, Computational Concepts in HCDE

B.Des. Industrial Design – National Institute of Design, Madhya Pradesh · Academic Excellence Award

2023

Relevant Coursework: Elements of Composition, Creativity & Ideation, Cognitive Ergonomics, System Design, Design for Human Behaviour

EXPERIENCE

UX/UI Designer · BRND Studio

March 2024 – June 2025

- Delivered 5 product designs through wireframing and prototyping in Figma across SaaS and AI-enabled software contexts, fostering cross-functional collaboration with developers, product management, and engineering teams in an agile environment.
- Conducted 12+ moderated usability testing sessions as part of user testing across 4 product launches, generating prioritized insight reports and research synthesis outputs that shaped 10+ design iterations before release.
- Architected information structures and visual design for an enterprise dashboard serving 200+ internal users, applying information architecture, logical reasoning, and systems-thinking to reduce navigation depth and streamline core task flows.
- Created and maintained visual design mockups and style guides in Figma for design systems, incorporating 80+ reusable UI components and interaction patterns, optimizing design workflows and reducing cross-team handoff time.

Product Design Intern · Grant Thornton Bharat

January 2023 – July 2023

- Mapped 6 end-to-end user flows and journey maps for artisan-facing products, surfacing 9 friction points that directed user-centered design solutions and improved customer engagement.
- Facilitated 4 co-design workshops with 25 artisans, applying human-centered design and design thinking principles to translate field insights into 3 commercially viable concepts.
- Synthesized 30+ hours of ethnographic field observations and competitive analysis into a structured design brief through qualitative user research and insight generation, guiding leadership decisions on 2 product initiatives.

Design Intern · Pichkaari Design Studio

June 2022 – August 2022

- Took initiative to design responsive interaction flows for 2 cross-platform products, removing friction stages and improving accessibility and usability.
- Led 20+ stakeholder focus groups across 4 client engagements, combining qualitative and quantitative research insights to strengthen stakeholder communication and align executive priorities with user-centered goals.
- Developed mid-fidelity mockups and prototypes for a ridesharing platform with 100M+ users, presenting 3 brand identity directions during design reviews and critiques with senior leadership.
- Designed a gamified workshop facilitation session for 50+ participants, raising post-session team alignment scores by 1.4x.

AI-ASSISTED PROJECTS

Twinkle - Custom Constellation Creator

- Architected an interactive star-mapping experience using Lovable and Cursor AI, enabling users to create and name personal constellations across 8,834 NASA catalog stars through AI-powered naming, gesture-based interactions, and mobile AR.

InTrack - Non-Invasive Nutrition Tracking

- Conceptualized a 5-tab wearable health application and interactive prototype for the ZeroToOne Hackathon, defining user journeys, AI-assisted nutrition guidance, and teleconsultation booking.

SKILLS

Design: Information Architecture · Interaction Design · Wireframing · Prototyping · Design Systems · User Flows · Accessibility

Research: Usability Testing · A/B Testing · User Interviews · Survey Design · Research Synthesis · Qualitative Research · Data-Driven Design

Tools: Figma · Sketch · Adobe Creative Suite · HTML/CSS · Cursor · Claude Code · Lovable · Python
